MEMORANDUM FOR: Project Director

THROUGH : Deputy Project Director

THROUGH : Project Director of Administration

SUBJECT : AQUATONE/FOG Departure

25X1

1. This afternoon Mr. James Cunningham and I had occasion to review the aspects involved in our proposed departure on or about 15 May 1957.

25X1

2. Recognizing the many reasons dictating such action and assuming that FOG also departs, I should like to note my feeling that the concurrent move of FOG to Del Rio, Texas may eliminate our opportunity for any reappraisal of the diplomatic/cover situation intended for approximately May or June. As I recall the reappraisal was to consider FOG movement to some other area such as Eielson Air Force Base, Fairbanks, Alaska as the 5th Weather Squadron, Provisional.

3. I believe we ^{can} could live with the AQUATONE movement to Edwards under the auspices of ARDC without a major hazard to our cover by playing upon the experimental nature of our equipment and the natural interest of ARDC in Air Force application of Project data.

Project Security Officer
